### OSTRICH POLITICS.

Which the Petersburg Index-Appeal

anything up its President Eliot's statement that upon

The reason that The Times-Dispatch's question caught the attention of the State was that it voiced a desire for information which was already stirring in every thoughtful mind. It is doubtless no mere coincidence that the only newspapers which have retained to the only newspapers which have retained to the point of the state was that The Times-Dispatch is a sure path to a liberal education is another matter. Certainly the educative ideal of Harvard, a cloneer in the elective study idea, has been altogether different during Dr. Elict's leadership.

It may well be that President Elict's found in the South before even the Southern Senators have roused themselves to the point of the only newspapers which have re-garded this desire as improper or "of-summary, as reported, was meant only in a large and general sense, and was have observed, no Tucker paper has had any fault to find with it whatever. But whichever candidate this question hurt the most, if it hurt is may have been from the point of view of one or the other of them the critics. We find to us. The simple fact is that papers like the Petersburg Index-Appeal make a great mistake in supposing that there is some way to hash up a question which leaps irresistibly from the bringing together of certain elements in the politics of a State.

We assure them that no conspiracy of silence could possibly have attained the properties and the announcement with a supplementation of the point of the find the first of the south will not be able to understand or to condone silent submission the part of the South will not be able to understand or to condone silent submission of the stand of the stand of the point of the stand of the point of the part of the South will not be able to understand or to condone silent submission of the flat then of the stand of the point of the stand of the point of the stand of the stand of the point of the stand of the point of the stand of the stand of the point of the stand of the stand of the point of the stand of the stand of the point of the stand o

thing like the theory which Dr. Ellot apparently lays down. Not one of intelligent to hope to save a burning house from destruction by stopping up one's eyes and ears and pretending not to notice it.

PENALIZING SMALL BANK ACCOUNTS.

The hanks in uptown New York have amounced that they will hereafter charge \$1 a month for handling check accounts which average less than \$200. No doubt this is sound business for the banks, but to the small depositor it exemplifies anew the old truth that mothing is so expensive as poverty. A small bank account appears enough of a drawback without having it penalized particularly when old Mr. Crossus, who has the personal advantages of a very large account, is draw-

## Borrowed Jingles.

"Ob. fratjaug day! Calloy!"
Out comes the April sun.
The lark trills high, the swallows ily
(Soon now the hot cross bun!).
The blithe bee hums, and baselall come.
The leaves are on the trees.
The curly lambs frisk by their dams
(Not dreaming of green pens!)
The daising peep and rhubarb's cheap,
Spring onlons now are ripe.
With fustic gles (and "twist," mayoo)
The shephere fills his pipe!
This is the strain I sing again
With sentimental wit,
A bard, you know, must write just so,
For nascitur, non fil!

The Earl of Crewe, speaking in the House of Lords the other day, as Secretary of State and principal representative of the government in that branch of the legislature, announced that the future of airships for military purposes was to such an extent-engaging the serious attention of the War Department that it had induced the Treasury to quadruple for the ensuing twelve months the amount of money allowed last year for experiments in aerial navigation. Even this will not bring the expenditure much over \$100,000, whereas the French War Department, spent last year \$250,000 while the German War Department devoted in 1908 nearly \$1,000,000 to the
